JACQUARD FABRIC

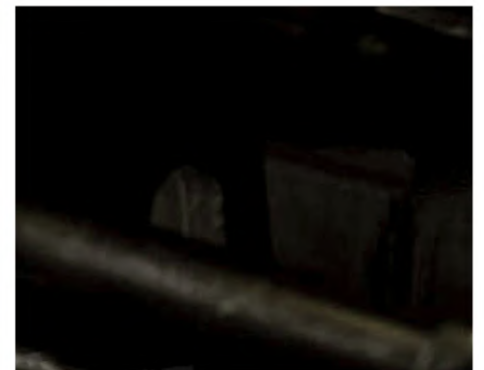

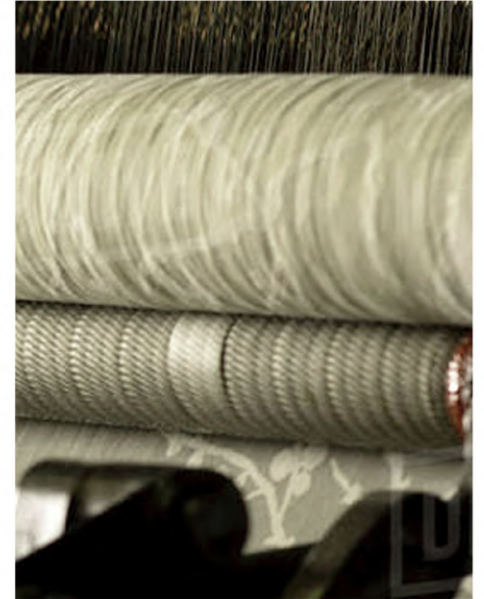

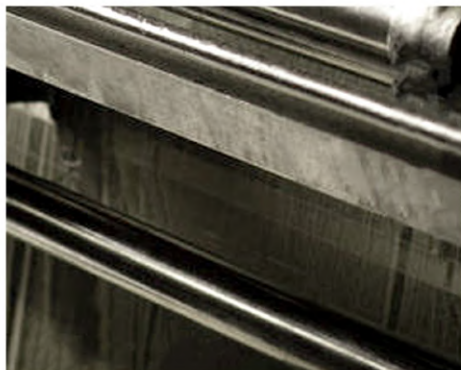

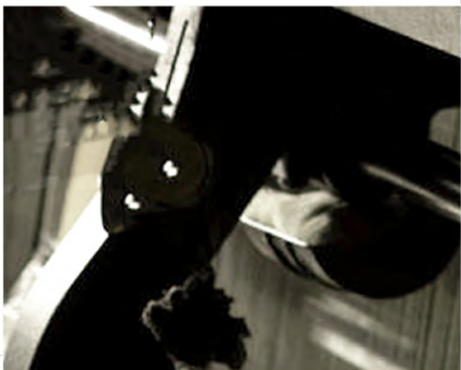

CHIFFON FABRIC

Weaving

Weaving is a method of fabric production in which two distinct sets of yarns or threads are interlaced at right angles to form a fabric.

NN Industries has the most advanced Air Jet weaving production facilities, having a production capacity of approximately 80,000 meters per day. The facility is operated by skilled workers under the supervision of highly qualified professionals. The setup has 20 modern weaving machines supported by cutting-edge back process machines. Through continuous improvement, learning and innovation, NN Industries is diversifying from basic grey fabric to value added fabric including all kinds of dyed yarn fabric.

PRINTING

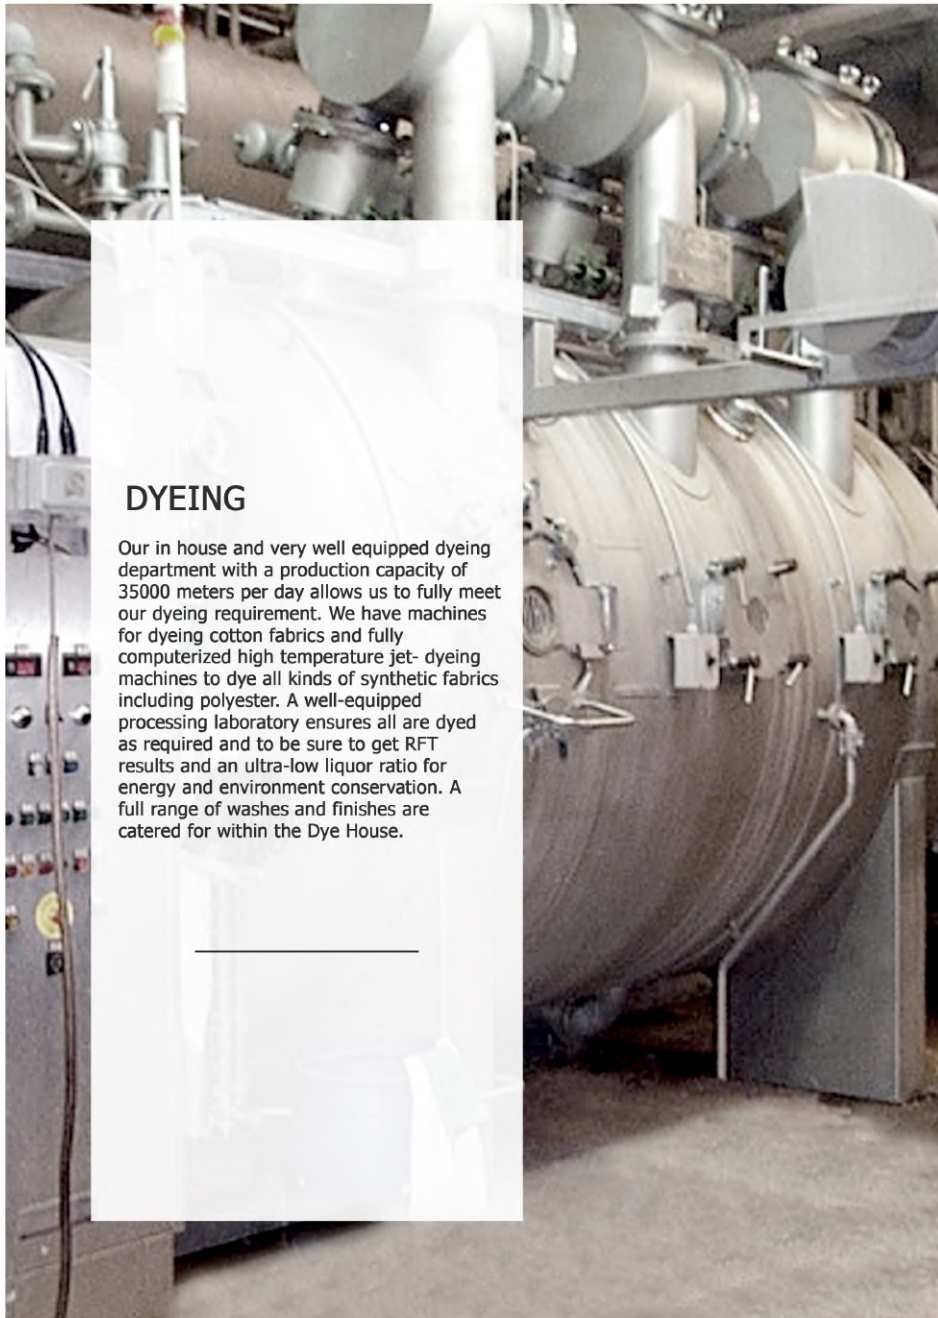

NN Industries with its digital prints has completely revolutionized fashion trends in Pakistan with diverse range of digitally printed fabrics. Furthermore, with rich industry knowledge about the textile sector, we have enormous experience and expertise in rendering digital printing service to our valued clients. By utilizing the latest cutting edge equipment we have the ability to print digital designs directly on fabric or use sublimation process to transfer the design first on paper and then using water based dye sublimation inks to create extra-ordinary designed fabrics.

Moreover, our digital printing services allow designers to be more creative with their work. We can print your design or we can create a completely unique set of design that can be printed on fabric of your choice. Besides, our printing technology make use of print vibrant colors and patterns without any restriction on pattern repeat or number of colors, unlike traditional printing services. Our customers can choose from wide range of colors that will not crock, bleed, or migrate and we can deliver printed fabrics within a short span of time.

In addition to, using the latest equipment and technology allows us to print digital design on pure and synthetic fabrics without any hassle or problem. We can print design on fabrics such as

- Silk
- Crape
- Viscose
- Twill

DYEING

Our in house and very well equipped dyeing department with a production capacity of 35000 meters per day allows us to fully meet our dyeing requirement. We have machines for dyeing cotton fabrics and fully computerized high temperature jet- dyeing machines to dye all kinds of synthetic fabrics including polyester. A well-equipped processing laboratory ensures all are dyed as required and to be sure to get RFT results and an ultra-low liquor ratio for energy and environment conservation. A full range of washes and finishes are catered for within the Dye House.

DYEING JET
